Federal reporting requirements require that OPI report the number of computers per school. OPI recognizes that computers are used across grade levels and Districts. However, some determinations must be made by the district as to how to report the computers. Possible ways to determine how to report shared computers are:

1. Determine the number of computers per school using a percentage of use formula. Or
2. Divide the total number of computers in the district evenly across the schools in that district. Or
3. Another method as determined locally.

\*\*\*\* Regardless of the method used, do not report any one computer more than once\*\*\*\*
